DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-31, drawn to a process of extrusion, classified in class 264, subclass 141.
- II. Claims 32-41, drawn to a composition, classified in class 514, subclass 137.

The inventions are distinct, each from the other because of the following reasons:

Inventions of groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group II has separate utility such as a pesticide. See MPEP § 806.05(d). It is also noted that group II could be used in a materially different process to make granules such as one that forms a sheet in a compression mold, then crushes the sheet to form granules.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to the office of applicant's attorney, Mr. Garrett Davis, on 22-MAY-2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
